DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(a) as being anticipated by WO 2004/047774.

The reference discloses on Page 27 a Temporary Hair Coloring Styling Gel comprising a keratin fraction and polyvinylpyrrolidone. The reference states at page 12, lines 26-28, that the keratin fraction is one of several available S-sulfonated keratin fractions.

Applicants' priority document has been reviewed, but specific support for the language of the claims cannot be found, and therefore the reference is effective under 35 USC 102(a).

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct

Art Unit: 1796

from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1 and 3-6 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 23-29 of copending Application No. 10/583,445. Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending claims anticipate the instant claims. The copending claims recite a membrane comprising a mixture of S-sulfonated keratin fraction and PVA or PVP.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

5. Claims 7-12, 14-21 and 23-26 are allowed over the prior art currently of record. The references cited on the International Search Report do not anticipate or render obvious the instant claims because none discloses or suggests the combination of S-sulfonated keratin in combination with PVA or PVP as recited in independent claims 1, 7

Art Unit: 1796

and 8, or the S-sulfonated keratin material which is chemically bonded to a monomer or polymer as recited in independent claim 21.
